RIMFIRE

22 Win Mag Speer® TNT Green™

TNT Green™ brings exciting non-tox technology to CCI®, and is the latest load to bolster their extensive rimfire lineup. This lead-free bullet boasts devastating performance on game and outstanding accuracy. The initial offering in 22 Win Mag is a great load for varmint and small game hunters everywhere. With explosive expansion on impact, impressive accuracy and great terminal performance, it hits critters hard.

Features & Benefits

- Explosive expansion on impact
- Impressive accuracy
- Lead-free projectile

22 Win Mag 30-gr TNT Green Jacketed Hollow-Point

2008 NEW PRODUCTS

RIMFIRE

Segmented Hollow-Point

CCI's unique Segmented Hollow-Point (SHP) bullet is now available in 22 Win Mag and a 22 Long Rifle subsonic load. This offering is ideal for bigger targets that require a larger wound area and makes perfect sense in the 22 WMR. The flat-shooting SHP is designed to break up into three sections on impact for even more stopping power. These three segments diverge from the main path for unique terminal performance on game. The subsonic 22 LR offering is great when hunting around a populated area and a quiet, effective round is needed.

Features & Benefits

- Unique bullet design segments on impact
- Great for larger targets
- Combines flat-shooting with extreme terminal effects
- Available in subsonic 22 Long Rifle offering or 22 WMR
