OPTICS—SCOPES

TR one Series

Nitrex Optics™ TR one series are tough and rugged scopes that are always ready when the hunt is on the line. As the industry's newest riflescopes, Nitrex is premium glass for premium hunters. From the hi-tech expertise of ATK—the world's leader in advanced weapons technology and makers of Federal Premium® Ammunition—Nitrex scopes are a fresh new choice for the serious hunter.

Manufactured in Japan, the world's leading manufacturer of quality glass, each Nitrex scope is subjected to some of the most rigorous tests in the industry. We heat it, freeze it, thump it, bump it, and submerge it—all in the quest to replicate the harshest hunting conditions. These steps are taken because we know hunters demand tough and rugged optics for their firearm.

Features & Benefits

- TruCoat™ fully multi-coated lenses for waterproof, scratch-proof protection
- Trex™ 3-Point Precision Adjustment for quick and easy adjustments
- Tough and rugged construction for a lifetime of service
- One piece tube riflescope design eliminates leakage
- Fast focus eyepiece provides crystal-clear images in seconds
- Shockproof, fogproof, waterproof

OPTICS—BINOCULARS

TR one Series

Nitrex Optics™ TR one series binoculars are tough and rugged optics that get you closer to the action. With Nitrex binoculars, you can penetrate the shadows and tell whether that bull is one to chase or one to let go. That's because as the industry's newest binoculars, Nitrex is premium glass for premium hunters. From the hi-tech expertise of ATK—the world's leader in advanced weapons technology and makers of Federal Premium® Ammunition—Nitrex binoculars are a fresh new choice for the serious hunter.

Manufactured in Japan, the world's leading manufacturer of quality glass, each Nitrex binocular is subjected to some of the most rigorous tests in the industry. We freeze it, thump it and bump it—all in the quest to replicate the harshest hunting conditions. These steps are taken because we know hunters demand tough and rugged gear. And Nitrex Optics delivers.

Features & Benefits

- Phase coated roof prism system for sleek design and stronger housing
- Fully multi-coated lenses for scratch-resistant, water repellent protection
- Rugged rubber armored finish to handle the nastiest weather
- Easy grip molded surface for a comfortable grip during long glassing sessions
- Shockproof, fogproof, waterproof

OPTICS ACCESSORIES

3" Sunshade

Shield your shot from the distracting rays of the sun with the 3" Nitrex™ Sunshade. For use on the 6-20 x 50mm AO riflescope, this sunshade blocks out glare and brings your target into clear focus no matter what angle the sun is at. Made from a rugged aluminum and treated with a matte black anodized coating, the sunshade screws into the objective to provide a welcome relief to shooters.

Features & Benefits

- Aluminum construction with matte black anodizing
- Fits the 6-20 x 50mm AO riflescope
- Screw in for rock solid hold and sturdy service
- 3" length provides shade from even sharp sun angles
