

2009 NEW PRODUCTS

CENTERFIRE RIFLE

Fusion® Centerfire Rifle

Fusion's presence in the market over the last few years has done more than turn a few heads. This aggressive, youthful-minded brand has taken over industry main-stays in the mid-priced category. Fusion® technology gives deer hunters an affordable option for all disciplines of modern deer hunting. Because the jacket and core are joined one molecule at a time, there is no chance for jacket/core separation. This year the centerfire rifle line gets four new offerings.

Features & Benefits

- Copper jacket is electro-chemically applied to the core through a sophisticated and refined molecular application technique
- Perfectly uniform jacket
- Skived, pre-programmed nose provides consistent expansion
- Maximum weight retention for deep penetration

Part No.	Description
F223FS1	223 Rem 62-gr Fusion
F260FS1	260 Rem 120-gr Fusion
F6555FS1	6.5 x 55 Swedish 140-gr Fusion
F4570FS1	45-70 Gov. 300-gr Fusion

2009 NEW PRODUCTS

CENTERFIRE HANDGUN

Fusion® Centerfire Handgun

Fusion offers several different products for rifle, handgun, shotgun and muzzleloader shooters alike. This technology gives deer hunters an unbelievably tough and accurate bullet, for an affordable price. Fusion now expands the handgun line to include the .460 and .500 S&W.

Features & Benefits

- Copper jacket is electro-chemically applied to the core through a sophisticated and refined molecular application technique
- Perfectly uniform jacket
