HANDGUN BULLETS

Gold Dot® .327 Federal Magnum

Last year Federal Premium® introduced the .327 Federal Magnum. This new caliber gives .357 like ballistics on the .32 platform. In its first year, it saw great success. Initially chambered in the Ruger SP101, the .327 Federal Mag is now offered in several other guns as well. With the amount of firearms on the market, there is definitely a need for reloading components. Handloaders will be happy to get the new 115-gr Gold Dot in .327 Federal Magnum.

Features & Benefits

- Unique process bonds jacket to core to prevent jacket/core separation
- Reliable expansion
- Tough construction
- .327 Federal Magnum compares ballistically to .357 Mag.

VARMINT BULLETS

TNT[®] Green[™]

This bullet was introduced last year in Federal Premium[®] and CCI[®] factory ammunition, and is now available for handloaders. The TNT[®] Green[™] is a lead-free bullet that gives shooters great accuracy and explosive performance. This unique bullet design combines a powdered-metal core with a thin jacket to get impressive terminal performance. Initial offerings will be in 30, 43 and 50-grain .224 configurations.

Features & Benefits

- Lead-free
- Accurate
- Explosive performance
