Blazer[®]

AMMUNITION

2010 AMMUNITION CATALOG

BLAZER.

GREAT ECONOMY THROUGH GREAT TECHNOLOGY. If casual practice is getting expensive, look to Blazer. Blazer uses aircraft-grade aluminum that's heat-treated to make an economical cartridge case. As the case is the most expensive component of any cartridge, our aluminum case lets us give you a cartridge that has all the performance of brass-case ammo at a more attractive price.

We load Speer bullets and CCI primers, both with a long record of happy users. You also get selection, from 25 Auto to 45 Colt. Blazer also features a selection of bullet weights and styles, something you can't get in typical "white box" ammunition or imports. Blazer is a great option to reduce the cost of practice. It lets you shoot more, and more often.

BLAZER. BRASS

ECONOMIC RELIABILITY. Blazer® Brass brings shooters the reliability and quality of ammunition built to SAAMI standards, and is backed by stringent ISO certified quality systems. Blazer Brass is loaded in reloadable brass cases for added value. Standard Boxer-type primers and primer pockets mean you can reload Blazer Brass cases just like any other case. Blazer Brass is loaded with a protected-base FMJ bullet. CCI® primers insure reliable ignition, and we load clean-burning propellants. Blazer Brass is available in 9mm Luger, 380 Auto, 38 Special, 357 Magnum, 40 S&W, and 45 Auto calibers with standard-weight bullets.

BLAZER. CLEAN-FIRE.

LEAD-FREE SHOOTING THAT'S EASY ON YOUR BUDGET.

We make Blazer® with CCI® Clean-Fire primers and Speer® TMJ bullets. Designed for indoor ranges, Blazer Clean-Fire virtually eliminates airborne lead, barium and antimony at the firing point, and gives you realistic recoil and point-of-impact. The air, your gun and your hands stay cleaner. Make your training time on the indoor range count with this great product.

THE VISIBLE DIFFERENCE

Spent Clean-Fire cases look almost unfired when compared to traditionally primed ammunition. The heavy metals have been removed, producing a clean burn.
