RIMFIRE RIFLE

CCI® TNT® Green™

CCI's TNT® Green™ is perfect for hunting prairie dogs or pesky small critters. This year, we bring this advanced non-lead bullet to the 17 HMR platform. Designed with the rimfire specialist in mind, these ammunition options are optimized for those hunters needing non-lead options. They also feature clean-burning propellants that keep actions cleaner. Accurate, hard-hitting and deadly, the TNT Green bullet boasts outstanding, devastating performance for hunters. 17 HMR has been a popular choice for varminters everywhere, and this new bullet provides explosive performance every time.

Features & Benefits

- 16-grain TNT® hollow point at 2500 fps
- Flat trajectory
- Sure-fire CCI® priming
- Explosive performance
- Non-lead

951	17 HMR 16-grain TNT Green 2500 fps

2010 NEW PRODUCTS

RIMFIRE RIFLE

CCI® 22 LR Short Range Green™

New this year, we're proud to bring you a non-lead solution in 22 LR. Short Range Green™ plinking rounds fill a void that has been around for a few years: a non-lead plinking option. This load features a jacketless bullet made of a copper particle and polymer mix. It gets reliable accuracy in common rifles out to 50 yards.

Features & Benefits

- Non-lead 22 LR plinking option
- Made of copper particle/polymer mix
- Reliable accuracy at 50 yards
